## Education

### Internship Java Programming

Soften Technologies • Ernakulam, Kerala

June 2019-Dec 2022

I began my advanced programming journey at Soften Technologies, where I developed a strong foundation in Java. This experience not only enhanced my programming skills but also deepened my understanding of object-oriented principles and software development practices.

### Bachelor in Computer Applications

Jai Bharath Arts and Science College • Ernakulam, Kerala

2019 – 2022

I started my programming journey from here. Learned some basics of programming languages throughout the time and done some project in my college.

---

## Projects

### Water Supply System

A web application using Node.js designed to facilitate the supply of water to rural areas. This project involved creating a robust backend to manage water distribution efficiently, ensuring that resources reached underserved communities in a timely and organized manner.

### Electric Vehicles Sales

A web application using PHP and MySQL for selling electric vehicles and related products. This platform enabled users to browse, purchase, and learn more about various e-vehicles and accessories, providing a seamless online shopping experience tailored to the growing e-vehicle market.

---

## Certificate

### Internship Certificate

I completed a 6-month internship as a Junior Software Programmer in Java Full Stack Development at Soften Technologies in Kadavanthra, Ernakulam. During this period, I gained hands-on experience in developing and maintaining full stack web applications, enhancing my skills in Java, front-end technologies, and database management.

### Project Completion Certificate

I successfully completed a project in PHP and MySQL at Progressive Software Solutions and Training in Muvattupuzha from August 16th to December 24th, 2021. This project allowed me to deepen my expertise in back-end development and database management, applying my knowledge to create robust and efficient web solutions.
